MEMORANDUM TO: Chief, Resources Division, ORR

ATTENTION

THROUGH : Chief, Requirements Branch, Reconnaissance Group, CGS

FROM : Chief, CIA/PID(NPIC)

SUBJECT : Thermal Power Plant Search at Shih-Ho-Tzu, Communist China

REFERENCES : (1) ORR Requirement 41/62 (Revised 17 June 1963)  
(2) CIA/PID Project No. C752/63

1. This memorandum is forwarded in response to your above mentioned requirement which requests location and description of a thermal power plant reported to be located near Shih-Ho-Tzu, Communist China.

2. Although a positive identification could not be made at this time, a possible thermal power plant is located on the western edge of the city (see enclosure). This is the only suspect facility discernible within a 20 nm radius of Shih-Ho-Tzu. The tentative identification was based on features common to Sino-Soviet thermal power plants that appeared to be present at this plant; that is, the structure or main-housing appears large; a possible smoke stack is located along the south side of the main building; and possible coal storage is located just east of the main structure. Power traces and substations were not identifiable. Measurements could not be made due to the poor quality photography over this facility. The building edge definition was rather poor and proper pointer location was not possible for mensural purposes.

3. All available photography covering this search area was scanned for the above mentioned facility. Of the many missions scanned only KEYHOLE

respectively, were used in this study. The photo quality and time base between these missions did not permit a more detailed description or a chronological development of the plant other than is presented herein.

4. The analyst assigned to this project was [redacted] who may be contacted on extension 2607 should you have any further questions concerning this study. The memorandum and enclosure completes this project.
